

Columbus Technical Society

Columbus Technical Society (CTS) is an affiliation of member organizations that hosts joint meetings for all member groups. Varied disciplines provide exposure to diverse topics and extended networking opportunities outside of one's own field.

Tour of Allied Mineral Products Research and Development Laboratory

Please include your Name
and CTS affiliation (i.e./
SWE, ACerS, student, etc.).

Refractory materials, especially monolithic refractories, are the unsung heroes of advanced technology. All the technology and conveniences of our modern world would not exist without refractory technology; mobile phones, computers, and rocket launches do not happen without refractories. From molten light metals containment, carbon to graphite conversion, home heating to foundry casting ... come see what we do to help contain these processes.

Join CTS on September 12 for a tour of the **Allied Mineral Products** Research and Development Laboratory to learn about monolithic refractories – their applications, installation methods, the tools used to develop them, and how they benefit society.

The evening will begin with an opportunity to network with **Allied Mineral Products** R&D staff and to learn more about these unsung heroes of the refractory industry. Subsequently, a brief introduction to the company and monolithic refractory technology will precede a tour of the laboratory facilities where R&D develops and characterizes its diverse product line.

We apologize, however. Employees of competitor companies in the refractories industry will not be permitted to register.

Allied Mineral Products, founded in Columbus in 1961, is a world leader in the design and manufacture of monolithic refractories and precast shapes. With strong sales and service teams in the foundry, aluminum, steel, heat treat/forging, and power generation/industrial markets, our success is based on our dedication to **Being There Worldwide with Refractory Solutions**.

Allied's strong company culture is built around teamwork, working smarter, safer, and together. Because it is an Employee Stock Ownership Plan (ESOP) company, Allied is owned by the employees.

Offering stimulating career opportunities at the corporate headquarters in Columbus, Ohio, as well as at research and technology centers, manufacturing facilities, and sales and service locations around the world, **Allied Mineral Products** invites hardworking, dedicated individuals to join the team not as employees, but as employee owners.

After turning left into main entrance, follow parking lot to the left, driving toward the William F. Winemiller building. Signs will be posted to guide guests.
